

2003->2010 migration MapiExceptionLogonFailed

Submitted by jdixon on Thu, 08/04/2011 - 9:28pm

Exchange 2010

Ran across a problem this morning when trying to migrate mailboxes from Exchange 2003 to Exchange 2010. Kept getting an error stating the mailbox database was offline and it was unable to make a connection to the server.

To resolve this problem I just went to the Exchange 2003 mailbox store, opened the security tab, and added the new Exchange 2010 to have full control. Afterwards everything moved perfectly!

```
Jacob Test
Error:
Mailbox database 'ff26e829-edf5-4be8-9bf6-bdaf0cb17b22' is offline.

MapiExceptionLogonFailed: Unable to make connection to the server.
