# How to Change the Desktop Icon Size on Windows 7 and Vista

Submitted by ingram on Tue, 01/03/2012 - 5:11pm
Windows 7 Icon Size

Changing the size of the desktop icons is very easy in Windows 7. Click anywhere on the desktop, then simply hold down the Ctrl key and scroll the mouse wheel up or down to increase or decrease the size. You may not prefer to have your icons 1/4 the size of you monitor, but sneak over to your co-workers computer while he is on lunch break and change theirs. See how long it takes them to figure it out:
