

How to Uninstall Internet Explorer 9 on Windows 7 SP1 and Revert to IE8

Submitted by ingram on Thu, 04/12/2012 - 10:41am

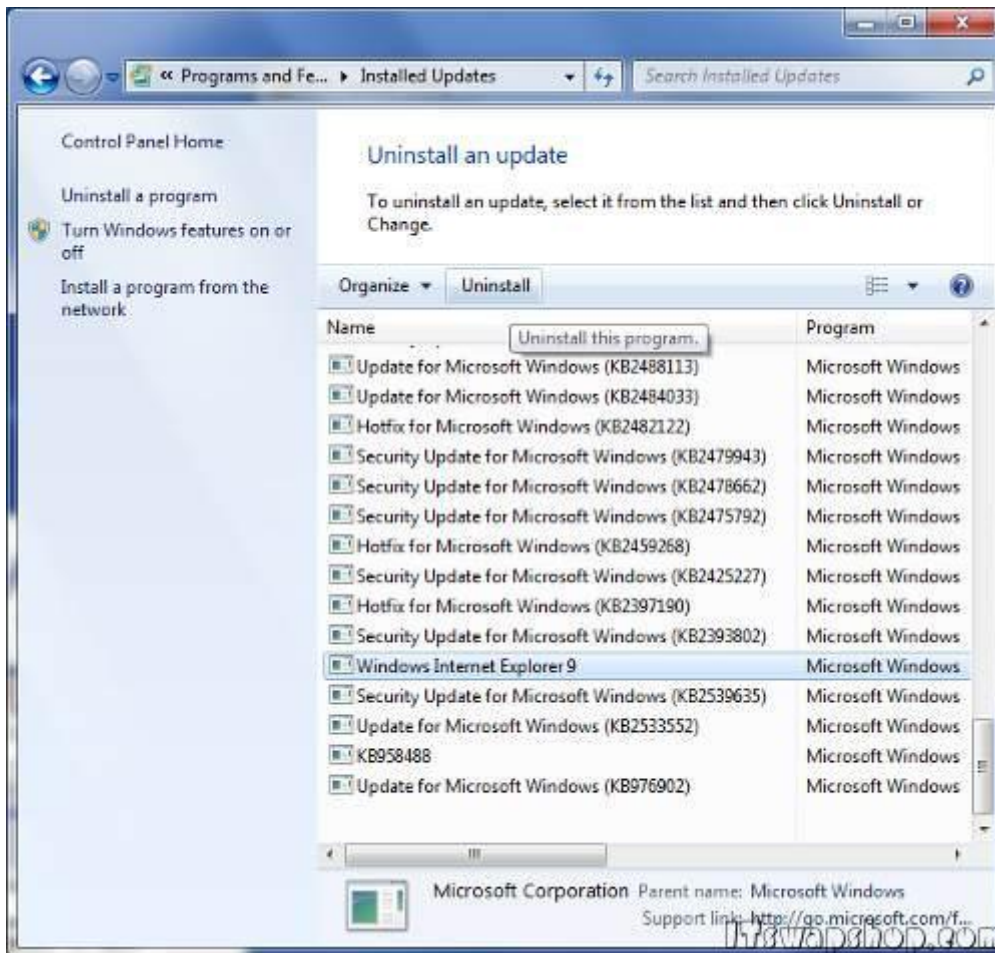

Internet Explorer

Windows 7 with service pack 1 comes loaded with Internet Explorer 9 by default. You can revert to Internet Explorer 8 by following these steps:

- Open "Programs and Features", formerly called "Add or Remove Programs", by clicking on the start button (or by holding down "Windows key + R" to bring up the run menu) and typing `appwiz.cpl` and hit enter. Click on "View installed updates":

- Select "Windows Internet Explorer 9" from the update list and click "Uninstall"

- Reboot your computer and you will have Internet Explorer 8
