

## How to Install 200+ Free and Open Source Games in One Command on Ubuntu 12.04 - 11.10 - 11.04 -10.04

Submitted by ingram on Sat, 06/02/2012 - 11:48am

Open Source Free Games

If you are looking for an easy way to install over 200 quality free and open source games in Ubuntu, this is it. I've taken the time to go through the Ubuntu Software Center and pick out some of the best games it has to offer. I tried to only include quality games (yes, I left out the glamorous xBill and Bugsx). I must warn, installing these games will download up to 8GB of data from the Ubuntu repositories and depending on your internet speed, could take over 4 hours to complete. For this reason, I recommend having a reliable internet connection before continuing. To install, run the following command for your release:

*Ubuntu 12.04:*

```
?sudo apt-get install supertuxkart supertux supertux-stable teeworlds nexuiz  
openarena frozen-bubble neverball neverputt frogatto sauerbraten kobodeluxe tumiki-  
fighters sdl-ball extremetuxracer extremetuxracer-extras blobby ri-li fretsonfire  
maelstrom titanion gnome-games kollision warmux torus-trooper torus-trooper-pure  
liquidwar performous performous-tools gltron xgalaga chromium-bsu kgoldrunner  
parsec47 gnujump kbreakout biniax2 briquolo powermanga krank plee-the-bear  
funnyboat mu-cade overgod rootage icebreaker bloboats empcommand enemylines3  
blockattack solarwolf alien-arena pyracerz nikwi monsterz epiphany a7xpg kolf noiz2sa  
pinball holotz-castle freegish xwelltris btanks koules vodovod blobandconquer  
blobwars penguin-command vectoroids criticalmass trackballs orbital-eunuchs-sniper  
luola luola-nostalgia ktron airstrike projectl tomatoes ketm njam gnibbles enemylines7  
gnome-breakout pacman pychess pioneers kmahjongg kiriki kshisen kfourinline  
gnome-mastermind triplea yahtzeesharp fltk1.3-games brutalchess ksudoku pybik  
opencity sgt-puzzles gbrainy gweled numptyphysics tremulous lightsoff palapeli
