

How to Download and Run a Program in Windows 7 With IE9 - 6 Step Tutorial

Submitted by ingram on Thu, 07/05/2012 - 5:48pm
Internet Explorer 9

Downloading a program/executable in Windows 7 is as easy as 1, 2, 3, 4, 5, and 6! Just follow this simple tutorial, and you will be downloading applications in no time!

Step 1: ?In your web browser (also know as "The Internet" or "Internet Explorer") click on a download link:

Agent Install and Uninstall Files

- [Install Agent](#)
 - [Agent Uninstaller](#)
 - [Linux Agent](#)
 - [Mac Agent](#)
 - [iOS Mobile Management](#)
 - [Android Mobile Management](#)
- www.itswapshop.com

?Step 2: ?Click on "Actions":

Agent Install and Uninstall Files

- [Install Agent](#)
- [Agent Uninstaller](#)
- [Linux Agent](#)
- [Mac Agent](#)
- [iOS Mobile Management](#)
- [Android Mobile Management](#)

?Step 3: Click on "Run":

Agent Install and Uninstall Files

- [Install Agent](#)
- [Agent Uninstaller](#)
- [Linux Agent](#)
- [Mac Agent](#)
- [iOS Mobile Management](#)
- [Android Mobile Management](#)

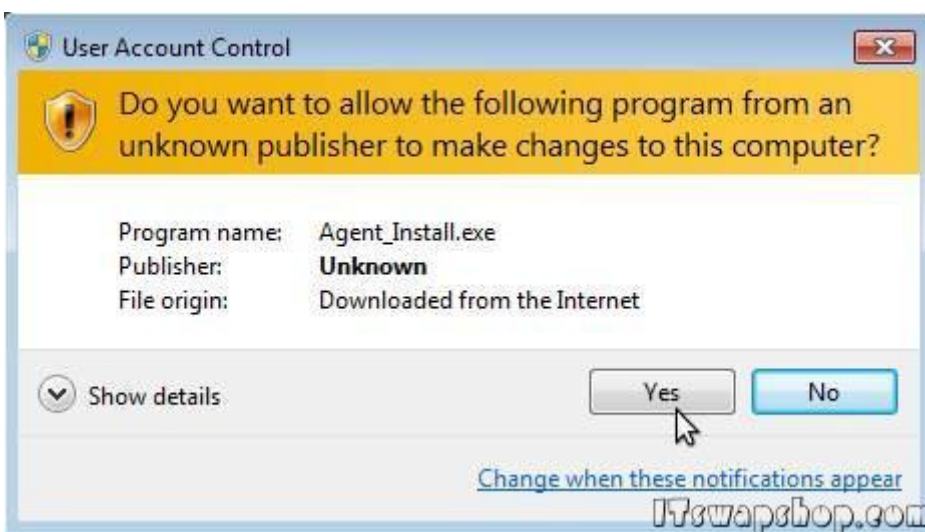

?Step 4: ?A SmartScreen Filter dialog box will open. Click on the downward pointing triangle next to "More Options":

?Step 5: ?Click on "Run anyway":

?Step 6: A User Account Control dialog box will open. Click on Yes:

That's it! You have now downloaded and launched a program/executable in Windows 7 using

Internet Explorer 9.

(Yes, this tutorial is designed to be sarcastic***)
