Linux - How to Find the Hostname

Submitted by ingram on Sat, 02/02/2013 - 9:04pm

Linux Find Hostname

Finding the hostname in Linux is very simple and basic. The method is the same, regardless of your Linux distribution (Ubuntu, openSUSE, Fedora...) Here are 2 ways to find the hostname:

Run the command "hostname":

hostname

Read the contents of "/etc/hostname":

cat /etc/hostname

.
