

Linux - History Command Tutorial - How to Run Previous Commands and Clear History

Submitted by ingram on Sun, 06/02/2013 - 4:37pm

history - tutorial run previous commands

The history command is very useful for people who use the command line. If you haven't used it before, now is a great time to make it a habit, as it can save you time.

The history command by itself will provide a numbered list of previously executed commands:

history - tutorial run previous commands 1

To execute one of the previously ran commands, use the exclamation mark followed by the number of the command (no spaces):

!3

history - tutorial run previous commands 2

To clear the history, run the following command:

history -c

history - tutorial run previous commands 3

To simply run the last ran command again, run the following command:

!!

Hope this helps some of you become more proficient in the command line!
