Easily and Quickly Reset or Recover Lost or Forgotten Windows Passwords With Windows Password R

[Windows Password Recovery Tool](#) [1] is an excellent piece of software that does exactly what it's described to do, recover lost or forgotten Windows passwords, simply & easily. It's one of the few products out there that works flawlessly on a variety of platforms, and can recover many types of passwords. I've personally examined & tested Windows Password Recovery Tool, and found it to be an invaluable tool in my arsenal of IT software. It's a must have product, from the home user that bought a used laptop and doesn't have the password, up to the experienced IT professional.

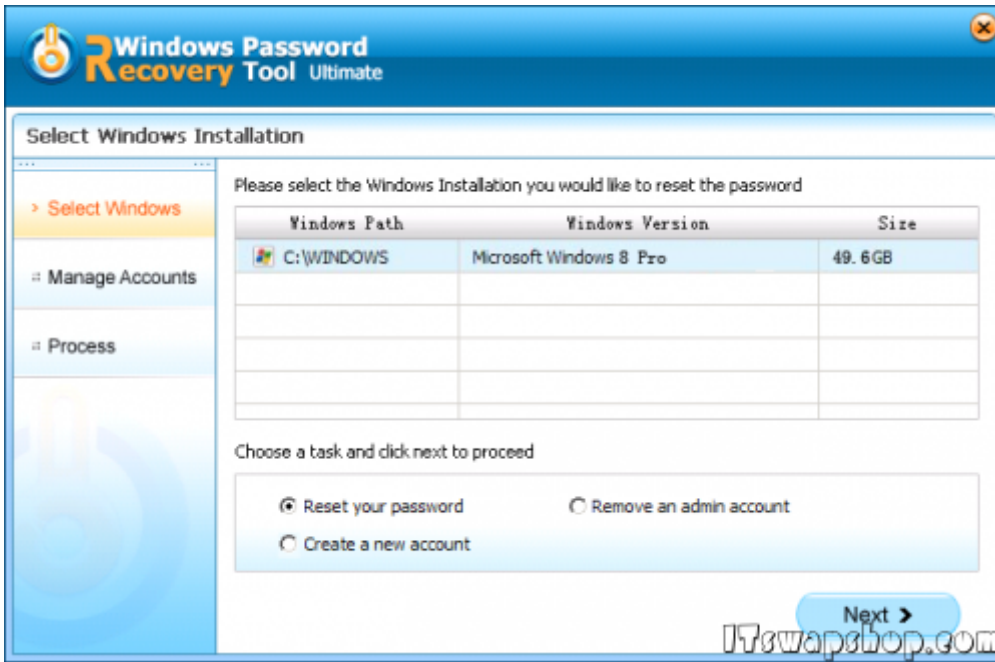

While the obvious focus of Windows Password Recovery is to reset lost or forgotten Windows passwords, it's capable of much more, and has many advanced features. Here are a few of the highlights:

- Remove or reset local Windows passwords
- Reset a Microsoft account password used to log into Windows
- Reset domain admin or domain user account passwords
- Create a new local admin account
- Create a new domain admin or domain user account
- Supports Windows 10/8.1/8/7/XP/Vista (32/64 bit) and Windows Server 2012 (R2)/2008 (R2)/2003 (R2)
- Supports a CD/DVD image or a bootable USB image
- Customize bootable image with custom drivers for RAID or special hardware
- 100% satisfaction guarantee

As you can see, the feature list can easily satisfy novice PC users, as well as enterprise technicians. While some of the features do require the Ultimate Edition, the Standard Edition covers the needs for the majority of users. Check the Edition Comparison Guide [here](#) [2].

Take a look at some of the screenshots below, and see for your self how easy and simple this application is to use. You can buy Windows Password Recovery Tool directly [here](#) [3].

The Windows Password Recovery Tool website has an excellent resource on how to use the software. It covers everything from creating a bootable USB drive, to resetting Microsoft account passwords. Please feel free to reference it for more information:
